Smart Toilet

Features

Foot sensing flushing, contact-free, innovative clean flushing way, convenient for men and people with bending difficulties.

When the foot approaches within 30mm of the sensing range, it will flush automatically.

Using capacitive sensing technology, more advanced comparing with infrared sensing technology on the market:
 ①Using capacitance sensor, the ceramics do not need to be punched, looks nicer;
 ②Infrared induction is easily affected by light, color, obstacles, etc., while capacitive induction is not.
 ③The failure rate of capacitive sensing is much lower than that of infrared sensing.

Side button

Electronically controlled flushing method A:
Press the side button to flush.

Remote control

Electronically controlled flushing method B:
Use the remote control to flush.

Sitting

Electronically controlled flushing method C:
After leaving the seat, the toilet (full) flushing function can be automatically activated.

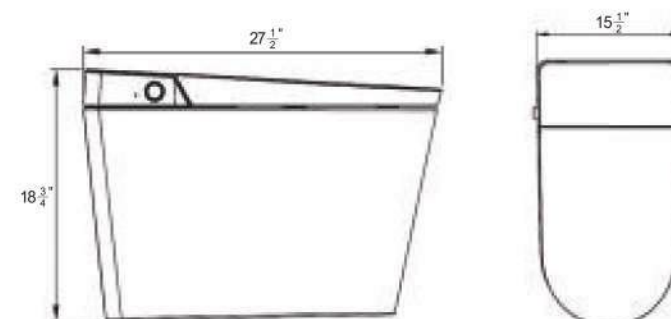

Foot sensor flushing

Foot sensing flushing method D:
Foot sensor for half flushing.

WC-G19

One-piece Smart Toilet
 Size: 27-1/2" × 15-1-2" × 18-3/4" (699×393×477mm)
 Strap: 12" (300mm)

Soft night light

Antibacterial seat

Antibacterial nozzle

Removable nozzle

Smart Toilet

V8200

One-piece Smart Toilet
Size: 28-3/4" × 15-3/8" × 22-5/8" (730×390×575mm)
